2. Citations and explanations :

Reference is made to the following document:

D: JP 2001-184037 A

The present invention relates to an apparatus for converting an image signal for the four-color display device.

1) The invention, as in Claims 1-13 is considered to be novel.

D, regarded as the closest prior art, discloses a display device which includes a standard converting means(303) using four-color conversion algorithm. The difference from the claimed invention is that the present invention involves a memory device of remembering plural white scaling factor.

2) The invention, as in Claim 1, is not considered to involve an inventive step.

The present invention differs from the disclosure mentioned in point 1). However, D discloses four-color conversion algorithm using scale constants and even if said memory is not disclosed in D, said memory is merely one of several straightforward possibilities from which the skilled person would select, according to circumstances, without the exercise of an inventive skill, in order to solve the problem posed.

3) The invention, as in Claim 1-13, is considered to be industrially applicable.
